SOUTHERN CALIFORNIA

Net of an assumed 70% Environmental Offsets, California has 17,549 MW of Class 3-7 wind scattered over its 164,000 square miles.

Baja CA has 17,850 MW of post-70% Environmental Offset developable wind power concentrated in the Northern & Central Sierra Juarez range.

ESTIMATED POTENTIAL FOR WIND DEVELOPMENT

Speed Bin -- MW Potential

- >= 14.5 mph -- 29,500 MW
- >= 15.7 mph -- 18,500 MW
- >= 16.8 mph -- 8,200 MW
- >= 17.9 mph -- 2,400 MW
- >= 19.0 mph -- 750 MW

* Assumes an approximate density of 20 MW/mi²

59,350MW before assumed 70% environmental offsets

Estimated potential for wind development pertains to the area of interest outlined in yellow

San Pedro Martir Park - Condor Habitat
